

TECHNICAL DATA FOR POWER CLEANER (75-29)

Formerly Stark Cleaner

Function; POWER CLEANER works on a basis of 'wash active substances in natural acids'! In other words the cleaner penetrates and reduces the surface tension of the dirt, gets under it, lifts it from the surface and leaves it ready to wipe away! Not only is it a heavy duty cleaner.

POWER CLEANER works great cold but works brilliantly warm.

POWER CLEANER is a multi functional product that will do away with at least 4 products. It will replace conventional bathroom cleaners, lime scale removers, kitchen degreasers as well as heavy-duty detergents, rust remover and metal cleaners!

POWER CLEANER is highly concentrated and under normal circumstances should be diluted before using. The dilution rate is dependant on the surface to be cleaned and the substance to be removed. Please see the appropriate chart below.

Used neat POWER CLEANER will dissolve cement deposits, limescale, stains on urinal tiles, moss, algae, rust and discolouration of brass and copper, oil, grease, and egg white stains.
Soap scum, tidemarks, water marks, rust spots and black mould can be removed from bathroom fittings, particularly effective against urinal staining. To remove limescale from showerheads they should be fully immersed.

Metal tarnishing & rust spots on brass, copper, aluminium or steel is effectively removed. Serious rust problems should be treated with RUST KILL and POWER CLEANER used weekly for maintenance.

Moss and Algae can be removed from concrete, brickwork and steel. It is also safe to use on natural and decorative stone. It is advisable to use a brush or sponge to hasten the cleaning on headstones.

For best cleaning results when diluted, it is best to use warm water as this improves the performance especially where greases and fats are a problem. Warm not hot water should be used where recommended.

POWER CLEANER is an ideal combination for industrial kitchens, restaurants and takeaways or any business that requires a heavy duty and multi purpose cleaner. Please see the list for details.

POWER CLEANER IS FULLY BIODEGRADABLE AND HAS NO ADVERSE EFFECT ON THE ENVIRONMENT.

DILUTION RATES FOR OPTIMUM CLEANING PERFORMANCE

To Clean/ Remove	Dilution	Recommended temperature
WATER DEPOSITS	10-1	COLD
URINALS/TOILETS	10-1	COLD
LIMESCALE	NEAT	COLD
SOAPSCUM	10-1	WARM-COLD
SHOWER STALLS	10-1	COLD
CEMENT/CONCRETE/STONE/ FLOORS	10-1	COLD TO WARM
SHOWERHEADS	NEAT	COLD IMMERSION
SWIMMING POOL EDGES	10-1	COLD
ENAMEL	40-1	WARM-COLD
CERAMIC	40-1	WARM-COLD
CHROME	40-1	WARM-COLD
STEEL	40-1	WARM-COLD
DEGREASING	20-1	WARM
GENERAL-MULTI PURPOSE USE	40-1	WARM-COLD
BRASS TARNISH	NEAT	COLD
COPPER TARNISH	NEAT	COLD
STEEL TARNISH	NEAT	COLD
ALUMINIUM TARNISH	10-1	COLD
BLOOD	30-1	WARM-COLD
LIGHT RUST	NEAT	COLD
To remove MOSS/ALGAE on CARAVANS	40-1	WARM-COLD
AQUARIUMS	40-1	COLD
NATURAL & SYNTHETIC STONE	10-1	COLD
