TOUCH-GUARD

ANTI-BACTERIAL DOOR PLATE

**A DIFFERENT KIND
OF PROTECTION**

**A BRAND NEW CONCEPT IN
CONVENIENT
HYGIENE MANAGEMENT**

TOTALLY SAFE TO USE

**(SO CONVENIENT, YOU WONT
EVEN NOTICE!)**

TOUCH-GUARD DOOR PLATES are the most conveniently effective way to help protect against contamination by hand. We all have to touch doors but how often do we think about the germs left behind from hands?

TOUCH-GUARD DOOR PLATES are made from tough plastic incorporating Bacti-G, a proven anti bacterial guard. The door plate works as a highly effective 'transmission break'. This means that any bacteria that is transmitted to the door plate through everyday hand contact will be eradicated instantly and will not contaminate the hand of the following person. Thus helping to prevent the spread of numerous bacterium including MRSA & E COLI.

TOUCH-GUARD DOORPLATES work instantly & leave no residue or taint on hands.

TOUCH-GUARD DOOR PLATES can be applied to any dry flat surface and continue to work for 4 months.

TOUCH-GUARD DOOR PLATES eradicate a wide range of bacterium, fungi & micro-organisms by piercing their outer cell wall. This type of technology is essential for hygiene sensitive environments. Particularly recommended for kitchen areas.

Touch Guards are supplied in packs of 10 at £35.00 per pack. They should be replaced 3 times a year. That is a yearly cost of only 2.9p per day per plate!
